

**SHIMIBAFT**

**Contractor's identification and evaluation documents**

**The call for identification of commercial companies  
to provide feed ( raffinate1) from foreign sources**

**Shimi Baft Petrochemical Complex in the special area of Imam port**

## **Chapter 1**

*Topic:*

Identification and evaluation of commercial companies for providing feed(raffinate1) with the specifications that are contained in the documents from external providing sources

*The Employer:*

Shimi Baft Company (Private Joint Stock)

Tehran - Afrika St. between Jahan Koodak and Mirdamad intersections, Padidar allay, No. 22

Through public call, this company intends to identify provider commercial companies, that have experience and expertise in this field, in order to provide a part of its RAFFINATE 1 FEED tised requirement. (Specifications of required feed are attached)

The conditions of this recall, job description, requirements and other items are also attached.

## **Chapter 2**

### Job description and requirements

*The generalities of the job, requirements and obligations are as follows:*

**1-1-** Providing feed (C4 RAFFINATE FEED) from external providing sources includes receiving feed from the foreign company, transporting feed to Imam port, ensuring cargo, clearance and transportation and finally delivery to the door of the Shimi Baft factory site 3. (DDP, BIK and PET Zone)

**1-2-** Due to the importance of providing feed to Shimi Baft company in order to prevent reduction or stoppage of the production line, the provider company should regularly receive and transport the purchased shipments according to the Shimi Baft company's quarterly (seasonal) contract.

**1-3-** The approximate amount (C4 RAFFINATE) feed that should be received in one year is 20000 tons and at the request of the employer, purchase will be done in the parts of 10000 tons.(10000 ton every season)

**1-4-** Shimi Baft company is free to choose from commercial companies that have the capability to provide and then based on its conditions, it will enter into a contract with the selected commercial companies.

**1-5-** The price that is announced by the commercial companies should be based on a coefficient of price of PLLATS global publication for **Persian Gulf oil**. the price of RAFFINATE 1 is different for each delivery in each month and will be mentioned in the contract based on the percentage or coefficient that the participants declare in the rate proposal table.

**1-6-** The announced price for each delivery will be mentioned a month before the PLLATS publication based on a coefficient of the average rate of **Persian Gulf oil**. for example, in order to buy and transport 3000 tons in February, the price criterion will be based on the agreed coefficient of **Persian Gulf oil** price from PALLETTS publication in the **Persian Gulf oil** rate in January.

(Average price of **Persian Gulf oil** in the previous month) × (The agreed coefficient in the tender) = (RAFFINATE price in the month of shipment)

**1-7-** The amount of the contract can be increased or decreased up to 25%.

**1-8-** Providing insurance for the transportation of goods from the origin to the destination (the factory door) is entirely the responsibility of the contractor and the employer won't be responsible for the accidents, injuries to third parties or damages to the environment. the cost of insurance and all the risks of the cargo are considered for the contractor.

**1-9-** Foreign provider (provider commercial company) includes receiving feed from a foreign company, transporting feed to Imam port, cargo insurance, and finally clearance, transportation and delivery of feed to the door of the Shimi Baft factory.<sup>3</sup> (DDP, BIK and PET Zone)

**1-10-** determining the purchase and transportation plan on a quarterly (seasonal) are all the responsibilities of the employer; and the employer must officially announce the purchase and transportation plan to the contractor (providing commercial company)  
The employer must notify the transporting company of the next month's plan one month in advance

**1-11-** The contract is the sales type and if any deductions are included in this contract, according to the laws of the Islamic Republic, the seller will be responsible.

**1-12-** The contractor (the provider or the seller) is obliged to deliver the goods exactly to the designated destination.

**1-13-** The contractor is obliged to provide the purchased RAFFINTE FEED 1 according to the technical specifications that are contained in the documents and deliver the inspection certification of each cargo, by the designated international inspection company, along with the transportation documents to the employer. if there is a quality discrepancy with the product specifications, the contractor is responsible for all damages caused by them. In addition, there will be inspection in the destination that is determined by the employer and is done based on the product specifications. the opinion of inspector is acceptable for the parties.

**1-14-** The settlement with the contractor will be done after the delivery of the cargo at the factory door and confirming the quality of the cargo by the inspector by the employer Chimi Baft and based on feed specifications RAFFINT FEED 1 included in documents , and also the submission of transportation and customs clearance documents.

**1-15-** The contractor is obliged to transport the cargo by an appropriate vehicle (in case of sea transportation, it should be a special gas ship with a technical inspection permit and should be ensured the tanks are not contaminated; and in case of a ground transportation through a tanker or isotank, it should be with a technical inspection permit of the transporting vehicle and it should also be ensured that the tanks are not contaminated) the contractor is responsible for the damage caused by the contamination of the tank.

**1-16-** The contractor is obliged to insure the goods until it reaches the destination in addition to the loading fee and transportation.

**1-17-** The contractor is responsible for the customs clearance operation along with its costs.  
Delivery semester It is of DDP BIK PETZONE type.

1-18- If the loading and delivery of the cargo is stopped for some time for any reasons with the official announcement of the employer, and as a result the work is interrupted, the employer will notify the contractor in writing. after the obstacle is removed, the contractor is obligated to start the purchase, loading, transportation and the delivery again in the shortest time after the employer announces the readiness.

1-19- The contractor is committed to observe safety in every way and any issues related to the protection and safety is the responsibility and expense of the contractor. If the employer's HSE unit determines that each of the parts of contractor's transportation lacks safety or standards in any way, the contractor is obliged to fix the problem or replace the part of the transportation.

1-20- The contractor acknowledges that he is fully aware of all the laws governing the economic zones and according to these laws he delivers the goods at the door of the Shimi Baft factory that is located in the 3rd site of petrochemical special economic zone.

1-21- The contractor acknowledges that he is fully aware of anti-money laundering laws and follows the instructions and laws related to it.

1-22- The contractor is obliged to submit his invoices officially according to the provisions of article 169 of the Tax Affairs Organization of the country.

1-23- The contractor is obliged to submit all the relevant documents related to providing feed in order to register and receive the currency allocation from the central bank, and also all transportation documents accepted by the employer's bank in order to clear the foreign exchange obligation, in original copy with a seal and signature to the employer.
